Almond peeling eye zone	60min	30LVL

<p>Beauty injections for radical fight against wrinkles and skin aging /The unique skin injection contains Hyaluronic Acid – the substance found in every single organic living thing that helps to moisture the skin and is used for facial augmentation. Over the years the hyaluronic acid within the body gradually diminishes thus affecting the appearance of the skin and creating wrinkles. With the help of so called „beauty injections” it is possible to renovate the hyaluronic acid within the skin by adding volume to deflated or depressed areas in the skin and smoothing wrinkles. The procedure of injection takes 20-40 minutes. The result it visible immediately and nobody will even suspect of having seen wrinkles in your face before. After injection there might be some slight redness, swelling or black and blue marks but these side-effects are not long-lasting. The newly gained appearance remains up to twelve months but it is good to bear in mind – the effect depends on several factors, for example, age, place of injection, amount of injection, skin condition, life style and general health condition/ Sign up early two days in advance</p>	<p>starting from 30LVL - 90LVL</p>	
<p>Beautiful lips - woman’s adornment/ In case a woman is not satisfied with her form of lips – volume, border, asymmetry or age caused changes, nowadays it is a defect that is easy to correct. Correction of lips is done by the help of biogel - hyaluronic acid. Form and volume of lips will depend on the applied technique and amount of gel. Pain relieving is done before the procedure so the lip correction procedure is totally painless. The duration of the effect lasts for 9 to 12 months. During this period the substance introduced into the skin gradually absorbs and the lips regain the previous condition.The result it visible immediately. It is recommended for the next month not to take sauna and solarium, and not to exercise excessive physical load./ Sign up early two days in advance</p>	<p>130LVL</p>	
<p>Vibrating Melomassage with Camertones/ Melomassage embraces melodrainage and melolifting. Melomassage ensures limfatic drainage and improves blood circulation. Melolifting is used to stimulate face muscle tone. It also prevents changes due to aging in facial, neck and low-neck zones./</p>	<p>15LVL</p>	
<p>Meder Fix Anti Rides / Noninvasive correction of mimic wrinkles (Botox effect). Reduces activity of muscles, fills in wrinkles. The active course takes 5 procedures each once in a week. The effect remains from 8 -12 months./</p>	<p>75LVL</p>
